fastFrame 300

Automated Stretching of Extra Small Canvas Prints

Your own premium canvas production with the latest innovation in canvas stretching for small size demands.

fastFrame 300 by Imaging Solutions

fastFrame 300 is a fully automated canvas stretching machine. It mounts up to 100 canvases per hour and needs about 25 seconds per frame, depending on the size. This is several times faster than manual production. The quality and precision of the frames are consistently high. fastFrame 300 is very easy to operate.

This system produces top-quality mounted canvases in extra small formats quickly and cost-effectively.

Eye-catching images on small mounted canvas prints

The request for decorative printed canvases is steadily increasing. Consumers embellish their homes with premium quality family photographs, exotic travel memories or individual artwork. Printed canvases in small formats are found in private homes, companies and event spaces.

To solve the demand in this strong emerging market, ISAG developed the innovative fastFrame 300 system for wrapping extra small size canvas prints.
